Energenic to install 6.1MW solar array for NJ food company

Published: May 5, 2010 *By James Cartledge* [Send to a colleague](#) | [Print](#)

New Jersey company Energenic has agreed a 15-year deal to install and maintain a 6.1-megawatt solar project in its home state.

The project is being developed for frozen foods company Seabrook Farms, and will comprise 27,000 solar panels across 21 acres.

Energenic, which is operating the project through subsidiary SBS Energy Partners, is a joint venture between long-time business partners Marina Energy and DCO Energy.

“We are eager to help Seabrook Farms create a more sustainable and reliable energy future,” said Frank DiCola, Energenic’s president and CEO. “This project will help to significantly reduce the facility’s energy costs.”

Savings

Third-generation family-owned business Seabrook Farms is expected to source around 8.4 million kilowatt-hours of energy each year from its new system – the equivalent of enough power for 785 homes.

The project is expected to save the vegetable producer around \$300,000 a year in energy costs.

“After looking at solar for two years, we believe Energenic is the right company to get the job done,” said Wes Seabrook, vice president of engineering for Seabrook Farms.

“We produce 90 million pounds of frozen vegetables and we are very excited about the cost savings this will produce.”
